Medigenic Essential keyboard , USB (&PS/2)

Features and Benefits

A cost-effective alternative to conventional keyboards and keyboard covers. Ideal wherever multiple users and a risk of bacterial cross contamination exists. The Medigenic® Essential (IP65) keyboard's flat surface quickly wipes clean with hospital-grade disinfectants, including alcohol-based compounds. Healthcare professionals can swiftly document care with excellent tactile key response. For Operating Rooms: surface silicone cover can easily be removed for extra intensive high temperature cleaning; it can be sterilized / autoclaved.

Main benefits are:

- Flat surface; sanitize in seconds
- Usable even when wearing gloves – with Tactile Feedback
- Dirt & water resistant; spill safe, easy, quick cleaning
- Single keystroke (On/Off key) disables keyboard during cleaning
- Medical environments, Laboratory, Food Industry
- Unique 3-D legend graphics; facilitates ideal visual finger placement and suggests 3-dimensional keys.

Specifications

Supported operating systems	Microsoft Windows® 7, Vista, XP, 2000
Chemical resistance	hospital-grade disinfectants, incl. alcohol-based compounds
Interface	USB (PS/2 Compatible, via cable adapter)
Environmental Sealing compliance	IP65
Key lay-out	104/105 keys; Includes numeric keypad, US lay-out
Temperature & Humidity Operation	0° to + 40°C, at 5% to 80% relative humidity (non-condensing)
Temperature & Humidity Storage	-40° to + 60°C, at 5% to 65% relative humidity (non-condens.)
Cable	2 M
Dimensions	About 462mm x 170mm x 34mm
Weight	1200 Grams (w/o packaging)
Color	Light Blue
Key life time	10,000,000 actuations per key
Material Cover	(Removable/replaceable) silicone; hypoallergenic, latex-free
Material keyboard	Keyboard housing: ABS plastics
Keyboard Cover	Removed: can be sterilized in an autoclave (max. 300°C)
Also available	Medigenic scroll mouse / replacement cover for keyboard
Agency Approvals	CE, FCC, RoHS, UL, EU EMC, EN60601-1-2, CB
