Compact Sanitizable Keyboard, white or black, USB

Features and Benefits

A compact sanitizable, medical Notebook style desktop keyboard. Particularly designed for use in healthcare applications. The silicon, (non-removable) surface protects the key field against ingress of dirt and fluids. Easy cleaning; disinfection by spray/wipe sanitizing. With low force key actuation and precise key guidance. Highly recommended for heavy duty type writing in hygiene-critical environments, particularly for office and administration applications.

- Thorough surface disinfection by spray/wipe sanitizing on flat key membrane without edges and seams.
- Clean Function allows for disabling the keyboard during cleaning ("Fn"+"Clean")
- Easy cleaning surface with most common hospital disinfectant solutions
- Positive low force tactile feedback
- Surface disinfection instead of invasive submersion cleaning:
 - ✓ Avoids outer and inner re-contamination by polluted suds
 - ✓ No risk of germ transmission by fluids leaking or dripping off the product
 - ✓ No contact with hollow spaces

Specifications

Protection Level	Splash water and dust resistant
Power	Input +5V + 5%/- 10% through USB port
Key Layout	83 keys, US lay out
Key Switch Technology	Scissors Balancing key guidance with contained contact system
Button Life	>5 million strokes
Interface	USB 2.0 (1.2MBit), low power (<100mA) current consumption
Key Force /Travel	Approx. 2,5 +/-0,5 mm
Dimensions	282 x 132 x 25 mm
Weight	540 g (w/o packaging)
Color	Black or white
Material	Silicone rubber surface, plastic housing
Operating temp. range	0°C to +70°C
Storage temp. range	-40°C to +70°C
Compatibility	All operating systems supporting USB (& PS/2 by adapter) keyboards
LED status indicators	Caps Lock, Num Lock, Scroll Lock, Clean Function: all 3 LEDs flashing
Agency Approvals	CE, FCC, RoHS
