

Wireless medical keyboard

Easy to clean and disinfect

Purekeys medical keyboards combine a completely flat top with the tactile feedback of a normal keyboard. The flat top surface is made of a high grade silicone rubber and can be cleaned with any

hospital grade disinfectant. With cleaning time less than 5 seconds, best practice to clean between patients can be easily achieved.

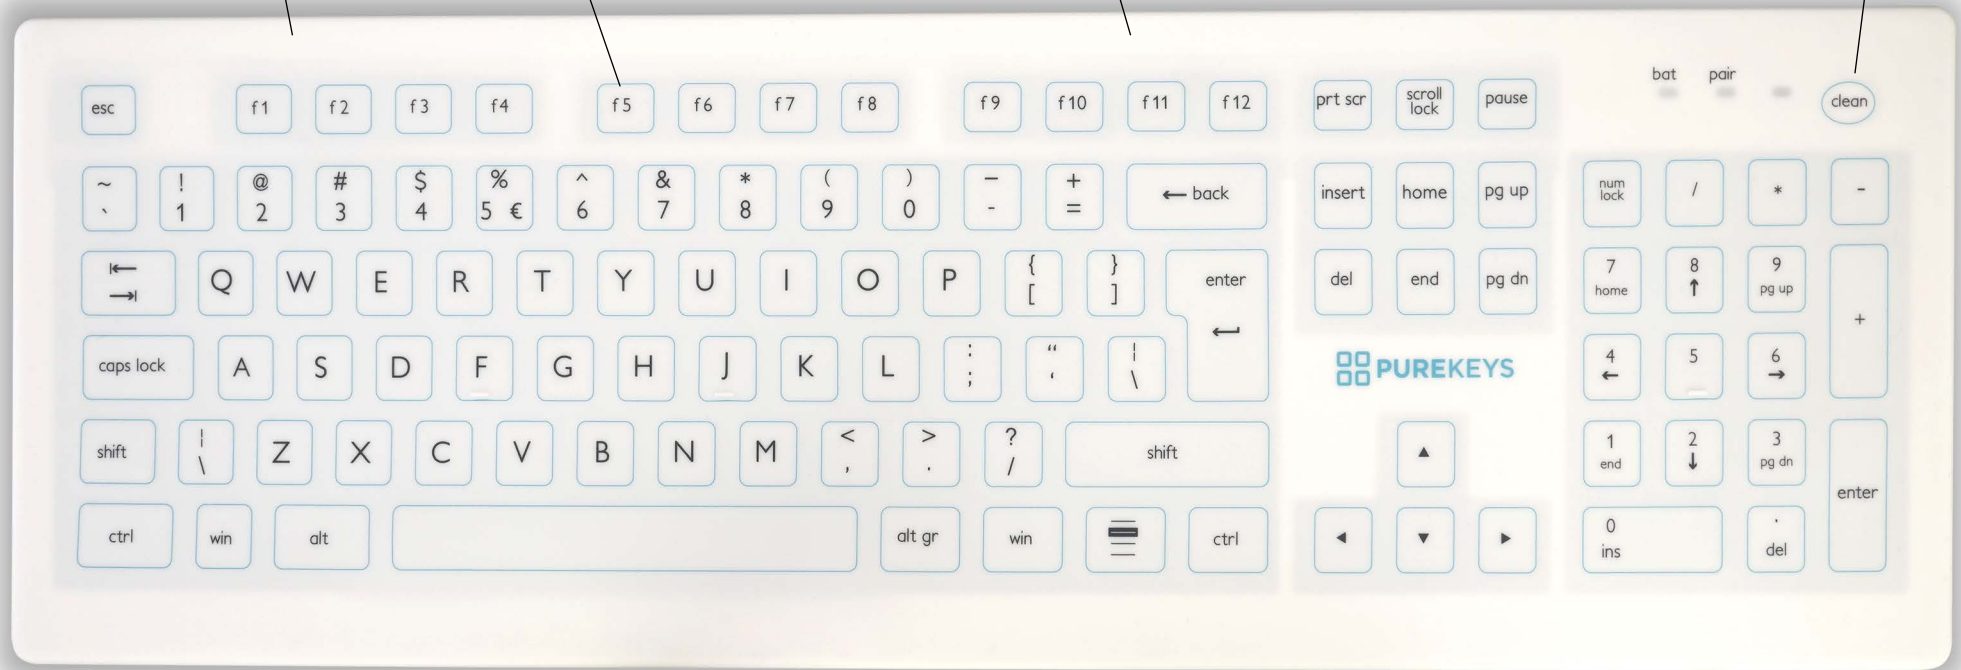

Flat surface: easy to clean without the need for immersion, no raised surfaces where bacteria can hide

Real scissor type keys with excellent tactile key response

Works with any Microsoft Windows-based PC

Silicone based cover, non allergenic, can be cleaned with hospital grade antibacterial fluids

Dedicated Clean Key to quickly disable input during cleaning procedures
