## Compact medical touch sensitive keyboard with touchpad, white, USB

### Features and Benefits

a high quality, reliable medical touch sensitive keyboard with integrated touchpad, particularly designed for the use in medical environments. The key field is covered by a glass, completely smooth surface. Rugged Corian® base, resistant to corrosive or staining chemicals. Luxury design. Easy placement; use it flat on its own durable rubber feet or mount it using the integrated brass mounts on the back. Main benefits are:

- Touch Sensitive key symbols with adjustable sensitivity (detects the slightest touch – even when wearing gloves) with Audible Feedback
  - Key symbols wear and tear free (printed beneath glass surface)
  - Total infection control
  - Thorough and easy surface disinfection by spray/wipe sanitizing, fast dry
  - Suitable for most common hospital disinfectant solutions
  - Safe: no risk of germ proliferation because of usage of impenetrable materials
- **Dirt & Water resistant; spill safe, easy cleaning**
  - **Good to the touch, compact, luxury design**
  - **Hospitals, Healthcare Providers, Laboratory, Food industry**
  - **Rugged & Mountable**
