

Article #: 201-122

Compact medical touch sensitive keyboard with touchpad, wireless, acrylic, white, USB

Features and Benefits

CleanKeys wireless come with two typing surfaces – glass (art.# 201-121) and molded (art.# 201-122). Glass is the original Cleankeys surface; being a completely flat, smooth surface it provides ultimate ease of cleaning. The key field of this version (art.# 201-122) is covered by a acrylic surface, makes it lighter then the glass version. The housing is ABS plastics. Cleankeys keyboards can be cleaned with anything suitable for the specific surface. For the acrylic or glass, use standard glass cleaner. For the ABS plastic use any standard counter-top cleaners.

This molded top model, has shallow key wells that provide a tactile feel, for those typists that need to feel the keys. Although not completely smooth, it is still easy to clean. The key wells are shallow enough as to not create pooling. Both models include the unique to Cleankeys 'TAP' feature.

Although Cleankeys is a touch sensitive keyboard, the 'TAP' feature allows you to rest your fingers on the keyboard surface. Keystrokes do not happen until you 'tap' the key. The 'TAP' feature, when combined with the tactile feel of the key wells on the molded model, enables an advanced typist to type at their usual typing speed.

All other features are the same for both models, including wireless.

Main benefits are:

- Touch Sensitive key symbols with adjustable sensitivity
- usable even when wearing gloves – with Audible Feedback
- Key symbols wear and tear free (printed beneath glass surface)
- Dirt & water resistant; spill safe, easy, quick cleaning
- Compact, luxury design
- Medical environments, Laboratory, Food Industry
- Rugged & mountable

Specifications

Supported operating systems	Windows® , Mac, Linux, Unix
Chemical resistance	Refer to CleanKeysinc.com for list of recommended cleaners
Interface	2.4 Ghz Wireless radio
Temperature range	Operation: 5° to + 32° C
Cable	2.0 M
Power	5V @ 1A (max)
Audio settings	Off, Low, Medium, Loud, Very Loud
Dimensions	About 373mm x 143mm x 23mm
Weight	730 Grams (w/o packaging)
Color	White
Led status indicators	Caps Lock, Num Lock, Locked
Key Technology	Touch Sensitive
Sensitivity settings	Off, Low, Medium, High
Mount	Three #6-32 inserts spaced in a MIS-D 75 Vesa standard pattern
Touchpad	Integrated into keyboard. Active area 62x46mm
Agency Approvals	CE, FCC, IP65, RoHS
