### Wireless Compact Medical Keyboard with Touchpad, black or white, USB

#### Features and Benefits

A wireless (RF 2,4 GHz) compact medical grade, IP68 keyboard with integrated touchpad. Notebook style, desktop keyboard. Particularly designed for hospital use. Spill safe, easy cleaning; disinfection by spray/wipe sanitizing.

- No hollow spaces for dirt and bacteria to accumulate
- Easy cleaning surface with most common hospital disinfectant solutions
- Positive tactile feedback
- Personnel safety: No risk of germ proliferation by submersion cleaning;
  - ✓ No re-contamination of open surfaces by polluted cleaning fluids flowing off the keyboard
  - ✓ No risk of germ transmission by excess fluids leaking or dripping of the product
  - ✓ No hollow spaces for polluted cleaning fluids to form a nutrient solution and grow bacteria, low profile keycaps.

#### Specifications

<b>Protection Level</b>	IP68
<b>Power</b>	Input +5V +/- 10% through USB port
<b>Key Layout</b>	82 keys, US lay out
<b>Key Switch Technology</b>	Scissors Balancing key guidance with contained contact system
<b>Button Life</b>	>5 million strokes
<b>Interface Dongle</b>	USB 2.0 low speed (1.2MBit) low power (<100mA) device
<b>Key Force /Travel</b>	Approx. 2,5 +/-0,5 mm
<b>Dimensions</b>	283 x 208 x 34 mm
<b>Weight</b>	735 g (w/o packaging, with batteries)
<b>Color</b>	Black or white
<b>Material</b>	Silicone rubber key cover, plastic housing
<b>Operating temp. range</b>	0°C to +50°C
<b>Storage temp. range</b>	-20°C to +70°C
<b>Compatibility</b>	All operating systems supporting USB keyboards
<b>Agency Approvals</b>	CE, FCC, RoHS
