## PureKeys Compact FA medical keyboard

### Features and Benefits

PureKeys medical keyboards combine maximum infection control and user comfort for professionals in the healthcare industries. They are designed with a complete flat surface to ensure maximum cleaning control. The underlying keys are high quality scissor type keys for optimal tactile feedback. Even when contaminated with blood or saliva these keyboards can be cleaned in seconds with any hospital grade antibacterial wipes and spray.

#### Main benefits are:

- Flat silicone (non-allergic) surface; sanitize in seconds
- Usable even when wearing gloves – with Tactile Feedback
- Dirt & water resistant (IP66); spill safe, easy, quick cleaning
- Single keystroke (clean-key) disables keyboard during cleaning
- Medical environments, Laboratory, Food Industry
- Compact: cart size
