Medigenic Scroll Mouse, USB (&PS/2)

Features and Benefits

An easily cleaned optical Mouse designed for Medical environments. The Medigenic Medical Scroll Mouse is impervious to antibacterial spray or liquid cleaning products. Made of the same pliant silicone-based material as its counterpart Medigenic Keyboards, this pointing device may also be rinsed as necessary. A smooth latex-free surface provides hypo-allergenic advantages, while eliminating nooks and crannies where bacteria can hide. The comfortable, ergonomic design features standard left, middle and right button functionality, along with scrolling buttons.

The Medigenic keyboard-mouse system provides an on-board alert indicator (on keyboard) that reminds users to clean them both at regularly timed intervals.

Main benefits are:

- No raised or recessed surfaces; sanitize in seconds
- Ergonomically designed to minimize hand and finger strain
- Dirt & water resistant; spill safe, easy, quick cleaning
- Excellent soft-touch tactile key response
- Medical environments, Laboratory, Food Industry
- Companion to the Medigenic Medical Keyboards.

Specifications

Supported operating systems	Microsoft Windows® 7, Vista, XP, 2000
Chemical resistance	hospital-grade disinfectants, incl. alcohol-based compounds
Interface	USB (PS/2 Compatible, via cable adapter)
Environmental Sealing compliance	IP65
Temperature & Humidity Operation	0° to + 40°C, at 5% to 80% relative humidity (non-condensing)
Temperature & Humidity Storage	-40° to + 60°C, at 5% to 65% relative humidity (non-condens.)
Cable	2 M
Dimensions	About 113mm x 67mm x 37mm
Weight	100 Grams (w/o packaging)
Color	Light Blue
Mouse buttons	5 buttons (left, middle, right, scroll up and scroll down)
Materials	Cover (non-removable): silicone; hypoallergenic, latex-free
Mouse tracking system	Optical, 400 dpi
Also available	Medigenic keyboards
Agency Approvals	CE, FCC, RoHS, UL, EU EMC, EN60950-1, CB
